List of Figures v
List of Tables xi
Preface xiii

Section 1: Aircraft Characteristics

Chapter 1: Aircraft Weights 3
1.1 Weight Groups 4
1.2 Gross Weights 23
1.3 Structural Limit Weights 26
1.4 Certified Limit Weights 37
1.5 Weight Efficiency Metrics 49

Chapter 2: Aircraft Capacities 61
2.1 Passenger Cabin Capacity 62
2.2 Fuel Capacity 82
2.3 Cargo Volume Capacity 86

Chapter 3: Aircraft Payloads 101
3.1 Maximum Structural Payload 102
3.2 Adaptive Payload 106
3.3 Volume-Limited Payload 110
3.4 Freighter Payload Metrics 111

Chapter 4: Engine Characteristics 141
4.1 Engine Design Fundamentals 142
4.2 Engine Thrust & Power Management 152
4.3 Engine Fuel Efficiency 161
4.4 Engine Reliability & Durability 165
4.5 Engine Noise & Emissions 173

Section 2: Aircraft Performance

Chapter 5: Study Flight Rules 193
5.1 Mission Profile Rules 194
5.2 Cabin Configuration Rules 215

Chapter 6: Airport Characteristics 231
6.1 Field Length 232
6.2 Field Environment 238
6.3 Performance Enhancements for Demanding Environments 249

Chapter 7: Performance Analysis 263
7.1 Payload Range Diagrams 264
7.2 Expanded Payload Range Diagrams 284
7.3 Advanced Payload Range Considerations 291
7.4 Factors Influencing Payload-Range Performance 303
7.5 Circle Charts 318
7.6 Seat-Range Diagrams 322

Chapter 8: Performance Enhancement Strategies 331
8.1 Advancements in Wing Design and Aerodynamics 332
8.2 Aircraft Weight Optimization Strategies 352
8.3 Engine Technology Evolution: Upgrades and Enhancements 360
